PROFESSIONAL SUMMARY

Technical Product Manager with 3+ years of experience shipping AI-powered products, marketplace, and consumer-facing digital products across mobility, travel, logistics, and rental platforms — collectively reaching over 50,000 users and supporting platforms processing ₦55M+ (\$40,000) in monthly GMV. Proven track record leading cross-functional teams from product discovery through launch, with hands-on production experience using Azure AI, OpenAI, and Gemini APIs. Combines deep technical fluency with strong product strategy and roadmap execution to build scalable, user-centric products. Actively targeting international and remote PM roles.

EXPERIENCE

Mactavis Digital Ltd · Technical Product Manager

May 2025 – Present

Lagos, Nigeria (Software Consultancy · Travel, Logistics & Marketplace)

- Led end-to-end product discovery, MVP scoping, and launch of Keru, a travel mobile app with admin dashboard, coordinating 5 engineers, 1 designer, and 1 QA to reach 1,000 users post-launch across the mobile apps.
- Defined product vision, roadmap priorities, user stories, acceptance criteria, and sprint execution processes, enabling consistent on-time delivery across two platforms.
- Spearheaded a full product and technical optimisation of Pizza Jungle ahead of 2025 Black Friday, implementing reliability improvements, UI enhancements, and rigorous pre-launch testing that enabled the platform to handle 3× normal order volume with zero service disruption, directly reversing the platform crashes and lost revenue that plagued the previous year's campaign.
- Implemented a Scheduled Orders feature on a platform processing ₦48M+ in monthly GMV, driving a 10% increase in order requests and expanding accessible order windows for customers beyond peak hours.

Lingroks · Technical Product Manager & Team Lead

January 2025 – April 2025

Lagos, Nigeria (Startup · AI Speech & Translation Platform)

- Led product development of an AI-powered real-time translation, summarisation, and text-to-speech platform across web and mobile, built on Azure AI, OpenAI, and Gemini APIs.
- Restructured delivery workflows and sprint cadence to compress projected timeline from 6 months to 3 months without compromising quality across product, engineering, and design functions.
- Developed lean product strategy and go-to-market plan for the 2025 Microsoft Imagine Cup, a globally recognised student technology competition, positioning the product against international AI entrants.

Brooi · Product Manager

September 2022 – January 2025

Lagos, Nigeria (Startup · Vacation Rental Marketplace)

- Managed end-to-end product development for a vacation rental marketplace, leading 8 engineers through MVP scoping, feature prioritisation, and roadmap execution to platform launch — reaching 200+ users and 4,000+ active property listings at launch.
- Defined user stories, acceptance criteria, and product specifications that directly aligned engineering output with business goals, maintaining a healthy and well-prioritised backlog throughout.
- Drove measurable improvements to booking flows, host operations, and internal workflows through close collaboration with design and engineering; led backlog prioritisation and sprint planning across 2 years.

Alvonant Technologies · Junior Product Manager

June 2022 – September 2022

Lagos, Nigeria (Software Consultancy)

- Supported product scoping, backlog management, and sprint coordination across multiple digital product initiatives during a 5-month formative placement.
- Conducted market research and competitive analysis to inform feature prioritisation; produced documentation to align cross-functional delivery teams with business objectives.

PRODUCT MANAGER PROJECTS

Goover — AI Co-pilot for African PMs · Founder & Product Lead

May 2026 – Present

Independent Project · Built with React/Vite, Supabase Edge Functions, Claude API · <https://wegoover.vercel.app>

- Identified an underserved user problem: African PMs applying to international roles lack tailored, context-aware application support. Validated demand and shipped V1 in under 3 weeks as a Mind the Product hackathon submission.
- Defined product scope, designed core user flows, and personally led frontend and AI integration, including Claude-powered CV analysis, role-fit scoring, and personalised coaching copy, demonstrating end-to-end AI PM capability from discovery to live product.

ReloStay — Property Rental & Travel Platform · Product & Frontend Engineer

2025 – Present

Independent Project · React, Supabase, Cloudinary

- Scoped and built an Airbnb-style accommodation platform as a primary vehicle for deepening React architecture skills and production AI-assisted development workflows.
- Applied product thinking across user flows, listing discovery, booking interactions, and marketplace experience design — implementing IntersectionObserver-based lazy loading and Cloudinary-powered media optimisation for performance.

TECHNICAL SKILLS

Product: Product Strategy, Roadmapping, MVP Definition & Launch, Multi-Sided Marketplace Products, Agile Product Management, User Research & Discovery, A/B Testing, Product Analytics, Stakeholder Management, Change Request Governance

AI / ML: LLM Integration (OpenAI, Gemini, Azure AI), Prompt Engineering, RAG Concepts, AI Product Evaluation, HITL Workflow Design, Responsible AI

Technical: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, SCSS, Git, SQL (basic), REST APIs, Supabase

Tools: Amplitude, Google Analytics, JIRA, Linear, Notion, ClickUp, Miro, Slack, Microsoft Teams, Claude Code, Lovable, Cursor

Languages: English (fluent), Yoruba (native)
